# Level Top SP

## Self-Levelling Cementitious Coating

### Product Description:

Level Top SP is an easy-to-use, self-levelling polymer-modified, cementitious-based, single-component compound designed for use on new, dull, or worn interior concrete.

Level Top SP provides a surface that is especially resistant to the penetration of moisture and degradation due to hydrolysis.

Level Top SP offers fast set properties that allow for a walkable wearing surface in as little as 12 hours and one that can be stained, polished or epoxy coated in as little as 24 hours from installation.

Level Top SP is the ideal solution for interior floor resurfacing in preparation for staining with a variety of stains such as Increte's Stain-Crete, Concrete Stain Sealer or Vibra-Stain.

For more information and application instructions visit [www.flowcretesa.co.za/euclid-chemical](http://www.flowcretesa.co.za/euclid-chemical)

### Product Benefits:

-  Offers a fluid consistency for easy self-levelling
-  Can be integrally colored with pigment packs
-  Floor can be dyed or stained within a few hours
-  Floor can be polished in 24 hours
-  Floor can be epoxy-coated in 24 hours
-  Offers high early strength for fast turnaround projects
-  Compatible with liquid densifiers for highly durable wearing surfaces

### Application Suitability:

- Levelling interior concrete surfaces
- Creating wearable surfaces for staining and polishing
