TAMMSCOAT

Decorative Acrylic Concrete & Masonry Coating

- ▶ Weather-proof concrete and other masonry surfaces from carbonation and exposure to the elements with Tammscoat, a decorative acrylic coating from Euclid Chemical.

Tammscoat

Acrylic Concrete & Masonry Coating

Product Description:

Tammscoat is a high build, water-based acrylic coating for use on both concrete and masonry surfaces, which offers excellent resistance to staining, wind driven rain, UV exposure and freeze thaw cycles.

Tammscoat also offers protection from the damaging effects of carbonation, which can result in corrosion to any reinforcing steel used within the structure.

Tammscoat resists airborne dirt, smog, industrial fumes and acid rain as well as providing a resistant barrier that prevents the growth of mildew or fungus.

Tammscoat can be tinted using universal tint systems and is available in a smooth and fine (sanded) texture. The material can be either spray or hand applied depending on the application.

For more information and application instructions visit www.flowcretesa.co.za/euclid-chemical

Product Benefits:

-  Resists degradation caused by UV exposure
-  Offers protection from the damaging effects of carbonation
-  Resists airborne dirt, smog, industrial fumes and acid rain
-  Protects against weather over a wide temperature range
-  Repels water, preventing water ingress into the structure
-  Resists mildew and fungus growth
-  Can be tinted using complementary colour packs
-  Offers excellent colour retention characteristics

Application Suitability:

- Concrete
- Concrete masonry
- Brick
- Stone
- Stucco

Available in a Wide Range of Vibrant Tints
