UltraGuard

Stain Resistant Protectant for Concrete

Product Description:

UltraGuard is a water-based polymeric protectant that improves the appearance and durability of concrete floors - including those that have been integrally coloured, stained or dyed.

UltraGuard contains a powerful, migratory stain-resistant additive that is activated with high-speed burnishing. As a result the material is well suited to application in retail outlets, grocery stores and restaurants.

UltraGuard is additionally fortified with lithium silicate, which further enhances the durability and hardness of the concrete surface.

UltraGuard can be used alone or in combination with a reactive sealer such as UltraSil Li+ to give concrete floors a glossy finish, harder surface and protective seal.

For more information and application instructions visit www.flowcretesa.co.za/euclid-chemical

Product Benefits:

- Water-based, low odor, low VOC formulation
- Provides concrete surfaces with excellent stain resistance
- Provides instant gloss to concrete floors once burnished
- Treated concrete exhibits enhanced density and durability
- Treated concrete is easier to maintain
- Protects colored or dyed concrete from UV degradation

Application Suitability:

- Interior concrete floors
- Commercial and retail floors
- Distribution centers
- Institutional floors
- Healthcare facilities
- Schools

Providing Excellent Stain Resistance:

Ketchup

Mustard

Pickle Juice

Balsamic Vinegar

Red Wine

Brake Fluid

Transmission Fluid

Used Engine Oil

The Euclid Group unites several of the world's leading construction chemicals brands in business together to offer a truly global service to customers. Its combined portfolio includes: concrete admixtures; chemical fibers; construction products; mining & tunneling products; specialty polymer flooring; grouts & leveling compounds; parking deck coatings; and decorative concrete.
