Eucolastic 1NS / 1SL

Non-Sag, Flexible Joint Sealants

Product Description:

Eucolastic 1NS is a single-component, non-sag, flexible joint sealant. Eucolastic 1NS is formulated with a unique silane-modified polyurethane polymer and provides performance benefits of both urethane and silicone sealants.

Eucolastic 1SL is a self-levelling version, easily poured into horizontal joints and cracks where it flows to a smooth, even finish.

Eucolastic 1NS / Eucolastic 1SL are available in cartridges for convenient caulk gun installation and both come in a variety of common colours.

With new, improved formulas and better performance, **Eucolastic Sealants** are an exceptional choice for both horizontal and vertical joint sealing applications.

Product Benefits:

Extremely durable in dynamic joints offering persistent adhesion once cured

Excellent wear resistance in highly trafficked areas

Cures quickly: skins in one hour and is tack-free in 3 to 4 hours

Can be used in "green" concrete 24 hours after forms are stripped

Wide service temperature range spanning -40°C to 85°C

Application Suitability:

- Precast concrete panels
- Window & door perimeters
- Masonry
- Above and below grade
- Machine bases of all types
- Anchor bolts
- Column baseplates

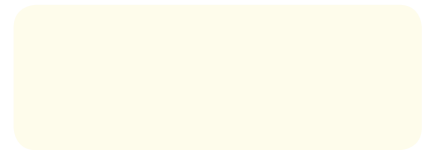

Available in a Range of Common Colours

Gray

Limestone

White

Stone

Bronze

Black

For more than 100 years, The Euclid Chemical Company has served as a leading supplier to the concrete and masonry industry offering a full line of engineered concrete admixture and construction products marketed under the EUCO brand name. As part of RPM International Inc, Flowcrete Africa works alongside Euclid Chemical to provide these products to its customers across Africa.
