

## Sanitol

**SANITOL** is a combined disinfectant, detergent, deodorant based on Quaternary Ammonium Compounds.

**SANITOL** is widely used to disinfect and control odours in industrial and municipal establishments, compounds, hospitals, office blocks and food industries.

**SANITOL** will give a 99.9% kill against Esch Coli and Staph Aureus in 5 minutes at a dilution of 1 in 350 when tested in accordance with SABS specification 636.

**SANITOL** is ideal for use through toilet stats.

### **DRAINS, URINALS, TOILETS, YARDS, COMPOUNDS, GARAGE CANS**

Sanitol can be used neat or diluted 1 part to 200 parts water.

### **FLOORS, WALLS, TABLES, BENCHES**

Sanitol can be diluted with up to 200 parts water.

### **CONTROL OF ATHLETES FOOT**

1 part Sanitol to 50 parts water in a footbath will kill athletes foot fungus and soothe tired and aching feet.

### **CUTS, SORES, WOUNDS, INSECT BITES**

Wash in solution of 1 tablespoon per litre of water.

### **LINEN AND NAPKINS**

1 tablespoon per litre of water as a final rinse will soften fabrics and help prevent nappy rash.

### **FOAM BATH**

A little Sanitol added to bath water will produce a fragrant foam bath and help prevent the unsightly bath rings.

**SANITOL** must not be used with incompatible soaps and detergents.
