

## ERAZE

**ERAZE** is a special blend of detergents, surfactants, emulsifiers and pine oil deodorant.

**ERAZE** is designed for the fast removal of oil, grease and hardened soil deposits from floor and other hard surfaces.

**ERAZE** is recommended for cleaning garage floors and forecourt, change rooms and toilets, engines and heavy plant.

- (1) Badly soiled floors can be quickly and easily cleaned by wetting the area well, sprinkling liberally with **ERAZE**, scrubbing with a hard broom and allowing to soak for 15 to 20 minutes. Finally rinse well with water and 'squeegee dry'.
- (2) Changerooms and toilets can be scrubbed with a 1 - 2% solution of **ERAZE** with water then rinsed out with clean water. **ERAZE** will leave a clean lingering pine odour.
- (3) Engines and heavy plant should be cleaned with a ½ - 1% solution of **ERAZE** with water, through a stream lance or pressure cleaner.
- (4) Dip Tank Process. Engine and machine parts and rock drills can be immersed in a 5% solution of **ERAZE** for 20 minutes and then rinsed.

**ERAZE** does not contain Caustic Soda.

**ERAZE** is bio-degradable.

**ERAZE** is safe on concrete and all metals.

**ERAZE** is non-flammable.

**ERAZE** is rust inhibited.

Eliminates coagulation of fats, oils and greases in pipelines and drains thus preventing blockages.
