

BioRemove Degreaser

Description

BioRemove is a concentrated high performance industrial detergent with degreasing and powerful penetrating, grease cutting properties. BioRemove is readily biodegradable containing no harmful nonylphenal ethacalates.

Uses

BioRemove is an all purpose detergent, ideally suited for use where routine cleaning operations are varied and require a versatile cleaning agent. It is designed to meet the hard surface cleaning requirements of hotels, bars, canteens, kitchens, clubs, compounds, garages, food processing plants, abattoirs, dairies, breweries and general industry. When used as directed BioRemove is safe on all surfaces, painted or natural. This economical liquid concentrate saves on cost, quantity and storage space. It makes a booster for most other built detergents and can be added at 2 – 3% by volume.

Economy

5 litres BioRemove added to 100 litres of water will give a 5% active detergent. This product can be further diluted to suit the requirements of the cleaning operation (depending on the degree of soiling).

Steam and High Pressure Cleaning

- Mechanical engine parts and industrial plants should be cleaned with 3-5% solution of BioRemove.
- For Abattoirs and general industry where there is excessive soiling (greasy floors) use a 5% solution of BioRemove.
- For industries requiring general purpose cleaning of floors, tiles and painted surfaces use a 2 – 4% solution of BioRemove.

Note

Flowcrete's products are guaranteed against defective materials and manufacture, and are sold subject to its standard terms and conditions of sale. Copies of which can be obtained on request.
