

Oneshot

Inhibited Caustic Floor Cleaner

Description

A synergistic blend of alkalies and aromatic alcohols, inhibited to prevent corrosion of ferrous metals.

Uses

Ideal for the removal of oil, grease, fats, blood from floors and other hard surfaces.

Applications

- For badly soiled floors, dilute 1:10 scrub in and leave to react for 5 to 10 minutes.
- Ablution areas can be cleaned in the same manner by scrubbing with a 1:20 solution.

Precautions

- Severe corrosion risk (due to high alkalinity) when brought in contact with non-ferrous metals.
- Wear protective clothing and avoid skin and eye contact.
- Spillages should be rinsed off immediately with copious amounts of fresh water.
